

A Fund of Coastal Community Foundation

Mission

Giving with Impact facilitates philanthropic-minded individuals and businesses to collectively pool funding and resources in an impact circle with the goal of benefitting charitable causes making a difference in our community.

Pooled Philanthropy

Through this community fund a person, family or business can make one donation, and through pooled philanthropy, make a broader impact in the community. **Giving with Impact** brings people together to leverage their resources of time, talent and treasure in a social and empowered setting in which they engage in continued learning and support of nonprofit organizations doing the groundwork to improve the lives and support of the highest need populations in our society.

This collective whole has the goal of strengthening our communities and specifically:

- Fully inform individuals and families of their potential and ability to maximize their ability to make an impact that benefits those less fortunate.
- Match philanthropists with other giving individuals and businesses to collectively impact the problems of our society by pooling funds and/or volunteering time with nonprofit organizations.
- Establish a peer network of people who enjoy one another’s company.
- Fund programs and volunteer at nonprofit organizations making a difference in our community
